FINDINGS & ANALYSIS: It is common for certain industries to offer a higher salary than other sectors; but one thing for sure, with relevant work experience or career advancement within the same industry, come better remunerations. An overview of the salary range is summarized for 17 Job Sectors to show the average monthly salary based on employees with “up to 2 years of working experience” and “5 years & above working experience” in each industry. For instance, Construction Industry, has the highest average monthly salary of RM1819 (up to 2 years); its engineers, architects, quantity surveyors or designers can expect to earn an average monthly salary of RM4095 (5 years & above) when they progress to a senior level within this industry. Few industries such as Oil & Gas / Human health and social work activities have the highest salary increment comparatively amongst other sectors, that is, experienced workers in these industries can expect their income to triple as they progress from entry to senior levels! Based on our overall observation, it can be concluded that careers which require specialized technical skills that are more diverse offer higher salary increment along its career progression; whereas for sectors such as R-Arts, entertainment and recreation / I-Accommodation and food service activities / Education, experienced workers may get lower increment as compared to other job sectors.
